Policy on attendance at NC3Rs events

The NC3Rs organises a wide range of scientific events where the use of animals and opportunities for the 3Rs can be critiqued and discussed, data and ideas shared, and best practice developed. Providing an open and safe environment is essential to the success of our events and ultimately their purpose in supporting the implementation of the 3Rs. We reserve the right to decline the registration of organisations and individuals whose attendance could either directly, or by association with others, undermine the success of our events.

This policy is reviewed on an annual basis by the NC3Rs Board.
